Inspiration to achieve financial freedom

EMPOWERED Wealth Strategies, Secrets to Financial Freedom is a newly released book created by two Sunshine Coast business women who guarantee to change lives.

Unlocking the real key to financial success, Sunshine Coast accountants and business partners, Martienne Freeth and Barbara Page, discuss topics that similar books have failed to identify.

The realisation that belief systems and the individual mindset play a key role in achieving financial freedom plays an integral role in the book.

Empowered Wealth Strategies seeks to inspire readers to discover

their dreams and desires, and recognise any limiting beliefs that, in the past, may have prevented them from achieving those desires.

As wealth strategists, coaches and property investors, Barbara and Martienne collectively offer the financial tools required to enable readers to increase their wealth. After years of experience and research they are certain of one thing – unless their clients have a prosperity consciousness, the tools provided will be rendered useless.

That is why this topic is given as much attention in the book as the more traditional financial and wealth

strategies, and offers the final piece to the puzzle.

Martienne and Barbara identify the most common limiting belief systems, and assist readers in changing their mindset by altering belief systems. The results assist them to achieve financial freedom.

Active Financial Answers, their accounting practice, has been established since 1994 and is recognised for expert taxation advice, business and wealth strategies and specialist superannuation services.
